# Specialty & Medical Drug Management List

(Effective October 1, 2026)

CareFirst Family of health care plans

Specialty drugs are medications that may be used to treat rare health conditions and require special handling (such as refrigeration), administration or monitoring. The following is a list of specialty drugs that may be covered through either your prescription or medical plan benefits as well as non-specialty drugs subject to utilization management; including Site of Care steerage; benefits are subject to individual member plan limitations. This list represents brand products in CAPS and generic products in lowercase italics. This list is updated based on coding effective the month prior to publication. Unless otherwise noted, drugs assigned to the pharmacy benefit must be filled at an in network specialty pharmacy. For questions about access options contact CVS Specialty at 855-264-3237
